### BUDGET NOTES 2019/2020 BUDGET

### 1. SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies which have been adopted in the preparation of this financial report are presented below and have been consistently applied unless stated otherwise:

### **Basis of Preparation**

The financial report is a general purpose financial report which has been prepared in accordance with Australian Accounting Standards (as they apply to local governments and not-for-profit entities), Australian Accounting Interpretations, other authoritative pronouncements of the Australian Accounting Standards Board, the *Local Government Act 1995* and accompanying regulations.

Except for cash flow information, the report has also been prepared on the accrual basis and is based on historical costs, modified, where applicable, by the measurement at fair value of selected non-current assets, financial assets and liabilities.

### The Local Government Reporting Entity

All funds through which the Council controls resources to carry on its functions have been included in the financial statements forming part of this financial report.

In the process of reporting on the local government as a single unit, all transactions and balances between those funds (for example, loans and transfers between Funds) have been eliminated.

### (a) Trust Funds

Any monies held in the Trust Fund, which Council holds in a custodian role, are excluded from the Financial Report.

The EMRC currently does not hold any trust fund monies.

### (b) Cash and Cash Equivalents

Cash and cash equivalents in the Statement of Financial Position comprise cash at bank and in hand and short-term deposits that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

For the purposes of the Statement of Cash Flows, cash and cash equivalents consist of cash and cash equivalents as defined above, net of outstanding bank overdrafts. Bank overdrafts, where applicable, are included as short-term borrowings in current liabilities on the Statement of Financial Position.

The EMRC currently does not hold any bank overdrafts.

### (c) Fixed Assets

Each class of fixed assets within either property, plant and equipment or infrastructure, is carried at cost or fair value as indicated less, where applicable, any accumulated depreciation and impairment losses.

### **Mandatory Requirements to Revalue Non-Current Assets**

In accordance with Local Government (Financial Management) Regulations 1996 r.17A(4), the Council is required to revalue an asset within a period of 3 years but no more than 5 years after the day on which the asset was last valued or revalued.

The EMRC has elected to undertake the asset revaluations on its assets on a 4 year rotational cycle commencing 2018/2019 (Year 1) as follows:

- Year 1 No revaluations to be undertaken;
- Year 2 Plant and Equipment;
- Year 3 Land and Buildings and Infrastructure; and
- Year 4 Art Works.

### 1. SIGNIFICANT ACCOUNTING POLICIES (Continued)

### **Land Under Control**

In accordance with *Local Government (Financial Management) Regulations 1996 r.16(a)*, the Council is required to include as an asset (by 30 June 2013), Crown Land operated by the local government as a golf course, showground, racecourse or other sporting or recreational facility of State or regional significance.

The Council does not have any crown land which comes under this regulation.

### **Land Under Roads**

In Western Australia, all land under roads is Crown land, the responsibility for managing which, is vested in the local government.

Effective as at 1 July 2008, Council elected not to recognise any value for land under roads acquired on or before 30 June 2008. This accords with the treatment available in Australian Accounting Standard AASB 1051 Land Under Roads and the fact Local Government (Financial Management) Regulations 1996 r.16 (a)(i) prohibits local governments from recognising such land as an asset.

In respect of land under roads acquired on or after 1 July 2008, as detailed above, *Local Government* (*Financial Management*) Regulations 1996 r.16(a)(i) prohibits local governments from recognising such land as an asset.

Whilst such treatment is inconsistent with the requirements of AASB 1051, *Local Government (Financial Management) Regulations 1996 r.4(2)* provides, in the event of such an inconsistency, the *Local Government (Financial Management) Regulations* prevail.

Consequently, any land under roads acquired on or after 1 July 2008 is not included as an asset of the Council.

The EMRC does not hold any land under roads.

### Initial Recognition and Measurement between Mandatory Revaluation Dates

All assets are initially recognised at cost and subsequently revalued in accordance with the mandatory measurement framework detailed above.

In relation to this initial measurement, cost is determined as the fair value of the assets given as consideration plus costs incidental to the acquisition. For assets acquired at no cost or for nominal consideration, cost is determined as fair value at the date of acquisition. The cost on non-current assets constructed by the Council includes the cost of all materials used in construction, direct labour on the project and an appropriate proportion of variable and fixed overheads.

Individual assets acquired between initial recognition and the next revaluation of the asset class in accordance with the mandatory measurement framework detailed above, are carried at cost less accumulated depreciation as management believed this approximates fair value. They will be subject to subsequent revaluation at the next anniversary date in accordance with the mandatory measurement framework detailed above.

### Revaluation

Increases in the carrying amount arising on revaluation of assets are credited to a revaluation surplus in equity. Decreases that offset previous increases of the same asset are recognised against revaluation surplus directly in equity. All other decreases are recognised in the Statement of Comprehensive Income.

### 1. SIGNIFICANT ACCOUNTING POLICIES (Continued)

### (c) Fixed Assets (continued)

### Depreciation

The depreciable amount of all fixed assets including buildings but excluding freehold land, are depreciated on a straight-line basis over the individual asset's useful life from the time the asset is held ready for use. Leasehold improvements are depreciated over the shorter of either the unexpired period of the lease or the estimated useful life of the improvements.

When an item of property, plant and equipment is revalued, any accumulated depreciation at the date of the revaluation is treated in one of the following ways:

- Restated proportionately with the change in the gross carrying amount of the asset so that the carrying amount of the asset after revaluation equals its revalued amount; or
- Eliminated against the gross carrying amount of the asset and the net amount restated to the revalued amount of the asset.

Major depreciation rates used for each class of depreciable asset are:

• Buildings 0.20 - 32.00% (based on components)

Structures

General 0.56 - 18.10% (based on components)

Class III and IV Waste Cells % of actual usage
Plant 3.67 - 57.66%
Furniture and fittings 5.97 - 33.33%
Equipment 5.33 - 52.59%

The asset residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing proceeds with the carrying amount. These gains and losses are included in the Statement of Comprehensive Income in the period in which they arise.

When revalued assets are disposed of, amounts included in the revaluation surplus relating to that asset are transferred to retained surplus.

### **Capitalisation Threshold**

Expenditure on items of equipment under \$5,000 are not capitalised. Rather, they are recorded on an asset inventory listing.

### (d) Fair Value of Assets and Liabilities

When performing a revaluation, the Council uses a mix of both independent and management valuations using the following as a guide:

Fair Value is the price that Council would receive to sell the asset or would have to pay to transfer the liability, in an orderly (i.e. unforced) transaction between independent, knowledgeable and willing market participants at the measurement date.

### 1. SIGNIFICANT ACCOUNTING POLICIES (Continued)

### (d) Fair Value of Assets and Liabilities (continued)

As fair value is a market-based measure, the closest equivalent observable market pricing information is used to determine fair value. Adjustments to market values may be made having regard to the characteristics of the specific asset. The fair values of assets that are not traded in an active market are determined using one or more valuation techniques. These valuation techniques maximise, to the extent possible, the use of observable market data.

Where possible, market information is extracted from either the principal market for the asset (i.e. the market with the greatest volume and level of activity for the asset) or, in the absence of such a market, the most advantageous market available to the entity at the end of the reporting period (i.e. the market that maximises the receipts from the sale of the asset after taking into account transaction costs and transport costs).

For non-financial assets, the fair value measurement also takes into account a market participant's ability to use the asset in its highest and best use or to sell it to another market participant that would use the asset in its highest and best use.

### Fair Value Hierarchy

AASB 13 requires the disclosure of fair value information by level of the fair value hierarchy, which categorises fair value measurement into one of three possible levels based on the lowest level that an input that is significant to the measurement can be categorised into as follows:

### Level 1

Measurements based on quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.

### Level 2

Measurements based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly.

### Level 3

Measurements based on unobservable inputs for the asset or liability.

The fair value of assets and liabilities that are not traded in an active market are determined using one or more valuation techniques. These valuation techniques maximise, to the extent possible, the use of observable market data. If all significant inputs required to measure fair value are observable, the asset or liability is included in Level 2. If one or more significant inputs are not based on observable market data, the asset or liability is included in Level 3.

### **Valuation Techniques**

The Council selects a valuation technique that is appropriate in the circumstances and for which sufficient data is available to measure fair value. The availability of sufficient and relevant data primarily depends on the specific characteristics of the asset or liability being measured. The valuation techniques selected by the Council are consistent with one or more of the following valuation approaches:

### Market Approach

Valuation techniques that use prices and other relevant information generated by market transactions for identical or similar assets or liabilities.

### Income Approach

Valuation techniques that convert estimated future cash flows or income and expenses into a single discounted present value.

### 1. SIGNIFICANT ACCOUNTING POLICIES (Continued)

### (d) Fair Value of Assets and Liabilities (continued)

### Cost Approach

Valuation techniques that reflect the current replacement cost of an asset at its current service capacity.

Each valuation technique requires inputs which reflect the assumptions that buyers and sellers would use when pricing the asset or liability, including assumptions about risks. When selecting a valuation technique, the Council gives priority to those techniques that maximise the use of observable inputs and minimise the use of unobservable inputs. Inputs that are developed using market data (such as publicly available information on actual transactions) and reflect the assumptions that buyers and sellers would generally use when pricing the asset or liability are considered observable, whereas inputs for which market data is not available and therefore are developed using the best information available about such assumptions are considered unobservable.

As detailed above, the mandatory measurement framework imposed by the *Local Government (Financial Management) Regulations 1996* requires, as a minimum, all assets carried at a revalued amount to be revalued in accordance with the regulatory framework.

### (e) Intangible Assets

### **Fasements**

Regulation 16 of the *Local Government (Financial Management) Regulations 1996* requires easements to be recognised as assets. The EMRC does not have any easements.

### (f) Rates

The EMRC does not levy rates. Accordingly, rating information as required under the *Local Government* (*Financial Management*) *Regulations 1996* has not been presented in this financial report.

### (g) Grants, Donations and Other Contributions

Grants, donations and other contributions are recognised as revenues when the local government obtains control over the assets comprising the contributions.

Conditional grants and contributions income is recognised subject to conditions applicable to the use of such income. Expenditure of those monies has been made in the manner specified under the conditions upon which the EMRC received those monies.

### (h) Trade and Other Payables

Trade and other payables represent liabilities for goods and services provided to the local government prior to the end of the financial year that are unpaid and arise when the local government becomes obliged to make future payments in respect of the purchase of these goods and services. The amounts are unsecured and are usually paid within 30 days of recognition.

### (i) Impairment

In accordance with Australian Accounting Standards, the Council's assets, other than inventories, are assessed at each reporting date to determine whether there is any indication they may be impaired. Where such an indication exists, an estimate of the recoverable amount of the asset is made in accordance with AASB 136 'Impairment of Assets' and appropriate adjustments made.

### 1. SIGNIFICANT ACCOUNTING POLICIES (Continued)

### (i) Impairment (continued)

An impairment loss is recognised whenever the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. Impairment losses are recognised immediately in profit or loss, unless the asset is carried at a revalued amount in accordance with another standard (e.g. AASB 116 Property, Plant and Equipment) whereby an impairment loss of a revalued asset is treated as a revaluation decrease in accordance with that other standard.

### (j) Revenue Recognition

### **Waste Services**

Revenue from waste services is recognised when the waste is received.

### Generation of Gas Services

Revenue from the generation of gas services is recognised on an accrual basis. Proceeds from the sale of Renewable Energy Certificates are only recognised when the certificates are sold.

### **Interest Income**

Interest income is recognised on an accrual basis.

### Sale of Goods and Disposal of Assets

Revenue from the sale of goods and disposal of other assets is recognised when the Council has passed control of the goods or other assets to the buyer.

### Rendering of Services

Revenue from the provision of services is recognised on an accrual basis.

### **Rovalties**

Royalty revenue is recognised on an accrual basis.

### (k) Inventories

### General

Inventories are valued at the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

### Land Held for Resale

Land purchased for development and/or resale is valued at the lower of cost and net realisable value. Cost includes the cost of acquisition, development and interest incurred on the financing of that land during its development. Interest and holding charges incurred after development is complete are recognised as expenses.

### (I) Goods and Services Tax

In accordance with recommended practice, revenues, expenses and assets capitalised are stated net of any GST recoverable. Receivables and payables in the Statement of Financial Position are stated inclusive of applicable GST. The net amount of GST recoverable from, or payable to the ATO is included with receivables or payables in the Statement of Financial Position.

Cash flows are included in the Statement of Cash Flows on a gross basis. The GST component of cash flows arising from investing and financing activities which is recoverable from, or payable to, the taxation authority is classified as operating cash flows.

### 1. SIGNIFICANT ACCOUNTING POLICIES (Continued)

### (m) Provisions

Provisions are recognised when: The Council has a present legal or constructive obligation as a result of past events; it is more likely than not that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated.

Provisions are measured using the best estimate of the amounts required to settle the obligations at the end of the reporting period.

### (n) Provision for Site Rehabilitation

A provision for the future costs associated with closing and restoring the landfill is recognised as liabilities within the financial accounts. The nature of work planned by Council includes cell capping, landform reconstruction, dismantling of site operating facilities and implementation of a revegetation plan to suit the final land use. The cost is based on estimated current costs, determined on a non-discounted basis.

The obligation for the EMRC to recognise the provision for site rehabilitation arises at the time the landfill cell is first put into use. Increments in the provision are calculated on the basis of the volumetric usage of the landfill cell air space during the year, present value of the costs for site rehabilitation and remaining capacity of the landfill site.

As per the independent engineers report from June 2015, the present value for the rehabilitation of the site has been calculated to be \$6,920,000 and has been deemed sufficient for post closure management purposes. This value will be reviewed on a five yearly cycle.

The provision is measured using the best estimate of the amounts required and is reassessed internally on an annual basis with an independent review being undertaken on a five year cycle.

In addition, Council has also adopted an incremental charge based on volumetric usage of landfill airspace for ongoing site rehabilitation during the in-use operations of the landfill.

### (o) Provision for Environmental Monitoring

A provision for the future costs associated with closing and restoring the landfill is recognised as liabilities within the financial accounts. The nature of work planned by Council includes monitoring of groundwater, surface water, leachate and landfill gas generation. The cost is based on estimated current costs, determined on a non-discounted basis.

The obligation for the EMRC to recognise the provision for environmental monitoring arises at the time the landfill cell is first put into use. Increments in the provision are calculated on the basis of the volumetric usage of the landfill cell air space during the year, present value of the costs for environmental monitoring and remaining capacity of the landfill site.

As per the independent engineers report from June 2015, the present value for the environmental monitoring of the site has been calculated to be \$3,760,000 and has been deemed sufficient for post closure management purposes.

The provision is measured using the best estimate of the amounts required and is reassessed internally on an annual basis with an independent review being undertaken on a five year cycle.

### (p) Borrowing Costs

Borrowing costs are recognised as an expense when incurred except where they are directly attributable to the acquisition, construction or production of a qualifying asset. Where this is the case, they are capitalised as part of the cost of the particular asset.

### 1. SIGNIFICANT ACCOUNTING POLICIES (Continued)

### (q) Critical Accounting Estimates

The preparation of a financial report in conformity with Australian Accounting Standards requires management to make judgements, estimates and assumptions that effect the application of policies and reported amounts of assets and liabilities, income and expenses.

The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances. The results of this experience and other factors combine to form the basis of making judgements about carrying values of assets and liabilities not readily apparent from other sources. Actual results may differ from these estimates.

### (r) Trade and Other Receivables

Trade and other receivables include amounts due from member Councils and non-members for unpaid fees and charges and other amounts due from third parties for goods sold and services performed in the ordinary course of business.

Receivables expected to be collected within 12 months of the end of the reporting period are classified as current assets. All other receivables are classified as non-current assets.

Collectability of trade receivables is reviewed on an ongoing basis. Debts that are known to be uncollectible are written off when identified. An allowance for doubtful debts is raised when there is objective evidence that they will not be collectible.

### (s) Employee Entitlements

The provisions for employee benefits relate to amounts expected to be paid for long service leave, annual leave, wages and salaries and are calculated as follows:

### (i) Short-term Employee Benefits

Provision is made for the Council's obligations for short-term employee benefits. Short-term employee benefits are benefits (other than termination benefits) that are expected to be settled wholly before 12 months after the end of the annual reporting period in which the employees render the related service, including wages, salaries and sick leave. Short-term employee benefits are measured at the (undiscounted) amounts expected to be paid when the obligation is settled.

The Council's obligations for short-term employee benefits such as wages, salaries and sick leave are recognised as a part of current trade and other payables in the statement of financial position. The Council's obligations for employees' annual leave and long service leave entitlements are recognised as provisions in the statement of financial position.

### (ii) Other long-term Employee Benefits

Provision is made for employees' long service leave and annual leave entitlements not expected to be settled wholly within 12 months after the end of the annual reporting period in which the employees render the related service. Other long-term employee benefits are measured at the present value of the expected future payments to be made to employees. Expected future payments incorporate anticipated future wage and salary levels, durations of service and employee departures and are discounted at rates determined by reference to market yields at the end of the reporting period on government bonds that have maturity dates that approximate the terms of the obligations.

The Council's obligations for long-term employee benefits are presented as non-current provisions in its statement of financial position, except where the Council does not have an unconditional right to defer settlement for at least 12 months after the end of the reporting period, in which case the obligations are presented as current provisions.

### 1. SIGNIFICANT ACCOUNTING POLICIES (Continued)

### (s) Employee Entitlements (continued)

### (iii) Superannuation Fund

The Council contributes to the WA Local Government Superannuation Plan (LGSP) and other nominated funds for qualifying employees as per statutory requirements (9.50% for 2018/19). It also co-contributes to the LGSP and other nominated funds for full scheme members (5% for 2018/19). Contributions to defined contribution plans are recognised as an expense as they become payable.

### (t) Rounding Of Amounts

All amounts shown in this annual financial report, other than the Schedule of Fees and Charges, are rounded to the nearest dollar. As a result of rounding, some minor reconciliation discrepancies may be present in the disclosures to the financial report.

### (u) Comparative Figures

Where required, comparative figures have been adjusted to conform with changes in presentation for the current financial year.

### (v) Budget Comparative Figures

Unless otherwise stated, the budget comparative figures shown in this annual financial budget relate to the original budget estimate for the relevant item of disclosure.

### (w) Leases

Leases of property, plant and equipment, where substantially all the risks and benefits incidental to the ownership of the asset, but not legal ownership, are transferred to the Council, are classified as finance leases. Finance leases are capitalised recording an asset and a liability equal to the present value of the minimum lease payments, including any guaranteed residual value. Leased assets are amortised over their estimated useful lives. Lease payments are allocated between the reduction of the lease liability and the lease interest expense for the period.

The EMRC does not currently have any finance leases.

### (x) Financial Instruments

### Initial recognition and measurement

Financial assets and financial liabilities are recognised when the entity becomes a party to the contractual provisions to the instrument. For financial assets, this is equivalent to the date that the Council commits itself to either the purchase or sale of the asset (i.e. trade date accounting is adopted). Financial instruments are initially measured at fair value plus transactions costs, except where the instrument is classified 'at fair value through profit or loss', in which case transaction costs are expensed to profit or loss immediately.

### Classification and subsequent measurement

Financial assets are subsequently measured at either fair value, amortised cost using the effective interest rate method or cost. Fair value represents the amount for which an asset could be exchanged or a liability settled, between knowledgeable, willing parties. Where available, quoted prices in an active market are used to determine fair value. In other circumstances, valuation techniques are adopted.

Amortised cost is calculated as:

- (i) the amount at which the financial asset or financial liability is measured at initial recognition;
- (ii) less principal repayments;
- (iii) plus or minus the cumulative amortisation of the differences, if any, between the amount initially recognised and the maturity amount calculated using the effective interest method; and
- (iv) less any reduction for impairment.

### 1. SIGNIFICANT ACCOUNTING POLICIES (Continued)

### (x) Financial Instruments (continued)

The effective interest method is used to allocate interest income or interest expense over the related period and is equivalent to the rate that exactly discounts estimated future cash payments or receipts (including fees, transaction costs and other premiums or discounts) through the expected life (or when this cannot be reliably predicted, the contractual term) of the financial instrument to the net carrying amount of the financial asset or financial liability. Revisions to expected future net cash flows will necessitate an adjustment to the carrying value with a consequential recognition of an income or expense in profit or loss.

The Council does not designate any interest in subsidiaries, associates or joint venture entities as being subject to the requirements of accounting standards specifically applicable to financial instruments.

### (i) Financial assets at fair value through profit or loss

Financial assets are classified at 'fair value through profit or loss' when they are either held for trading for the purpose of short term profit taking, derivatives not held for hedging purposes, or when they are designated as such to avoid an accounting mismatch or to enable performance evaluation where a group of financial assets is managed by key management personnel on a fair value basis in accordance with a documented risk management or investment strategy. Such assets are subsequently measured at fair value with changes in carrying value being included in profit or loss.

### (ii) Loans and Receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market are subsequently measured at amortised cost.

Loans and receivables are included in current assets, except for those which are not expected to mature within 12 months after the end of the reporting period. (All other loans and receivables are classified as non-current assets.)

### (iii) Held-to-maturity investments

Held-to-maturity investments are non-derivative financial assets that have fixed maturities and fixed or determinable payments, and it is the Council's intention to hold these investments to maturity. They are subsequently measured at amortised cost.

Held-to-maturity investments are included in non-current assets, except for those which are expected to mature within 12 months after the end of the reporting period. (All other investments are classified as current assets.)

If during the period the Council sold or reclassified more than as significant amount of the held-to-maturity investments before maturity, the entire held-to-maturity investments category would be tainted and reclassified as available-for-sale.

### (iv) Available for sale financial assets

Available-for-sale financial assets are non-derivative financial assets that are either not suitable to be classified into other categories of financial assets due to their nature, or they are designated as such by management. They comprise investments in the equity of other entities where there is neither a fixed maturity nor fixed or determinable payments.

Available-for-sale financial assets are included in non-current assets, except for those which are expected to mature within 12 months after the end of the reporting period. (All other financial assets are classified as current assets.)

### 1. SIGNIFICANT ACCOUNTING POLICIES (Continued)

### (x) Financial Instruments (continued)

### (v) Financial Liabilities

Non-derivative financial liabilities (excluding financial guarantees) are subsequently measured at amortised cost.

### (vi) Fair Value

Fair value is determined based on current bid prices of all quoted investments. Valuation techniques are applied to determine the fair value of all unlisted securities, including arm's length transactions, reference to similar instruments and option pricing models.

### **Impairment**

At each reporting date, the Council assesses whether there is objective evidence that a financial instrument has been impaired. In the case of available-for-sale financial instruments, a prolonged decline in the value of the instrument is considered to determine whether an impairment has arisen. Impairment losses are recognised in the statement of comprehensive income.

### Derecognition

Financial assets are derecognised where the contractual rights to receipt of cash flows expires or the asset is transferred to another party whereby the entity no longer has any significant continuing involvement in the risks and benefits associated with the asset. Financial liabilities are derecognised where the related obligations are either discharged, cancelled or expired. The difference between the carrying value of the financial liability extinguished or transferred to another party and the fair value of consideration paid, including the transfer of non-cash assets or liabilities assumed is recognised in profit or loss.

### (y) Current and Non-Current Classification

In the determination of whether an asset or liability is current or non-current, consideration is given to the time when each asset or liability is expected to be settled. The asset or liability is classified as current if it is expected to be settled within the next 12 months, being the Council's operational cycle. In the case of liabilities where the Council does not have the unconditional right to defer settlement beyond 12 months, such as vested long service leave, the liability is classified as current even if not expected to be settled within the next 12 months.

Inventories held for trading are classified as current even if not expected to be realised in the next 12 months except for land held for sale where it is held as non-current based on the Council's intentions to release for sale.

### (z) Landfill Cells

There are three general components of cell construction:

- · Cell excavation and development costs;
- · Cell liner costs; and
- · Cell capping costs.

All cell excavation and development costs and cell liner costs are capitalised and depreciated over the useful life of the cell based on the volumetric usage of the landfill cell air space during the year.

Cell capping costs are expensed as they occur as part of ongoing site rehabilitation.

### 2. PROGRAMS

The activities relating to the EMRC's programs reported on in the Operating Statement are as follows:

### Governance

Records income and expenditure relating to the administration and operation of facilities and services to members of Council together with other administrative governance costs.

### **General Purpose Funding**

Records interest revenue as well as other general purpose revenue.

### **Community Amenities**

Records income and expenditure associated with the Class III cell, Class IV cell, weighbridge, and transfer station at the Red Hill Waste Management Facility, the Hazelmere Resource Recovery Site and the Coppin Road and Mathieson Road transfer stations.

### **Other Property and Services**

Records income and expenditure for public works overheads, plant operation, materials, salaries and wages. It also records income and expenditure for the Environmental Service departments (incorporating various Environmental Projects), the operations of the Ascot Place activity, and income and expenditure relating to the Regional Development activity incorporating various projects.

### 3. RECONCILIATION OF RATES LEVIED

The EMRC does not levy rates therefore a Rate Setting Statement [Local Government (Financial Management) Regulations 1996: 22(1)(d) and 30(1)(c)] has not been prepared.

### 4. NOTES TO THE STATEMENT OF CASH FLOWS

### (i) Reconciliation of Cash

For the purpose of the statement of cash flows, The EMRC considers cash to include cash on hand, cash at bank and bank term deposits. Cash at the end of the reporting period as shown in the statement of cash flows is as follows:

	BUDGET 2018/2019 \$	FORECAST 2018/2019 \$	BUDGET 2019/2020 \$
Cash - Unrestricted	4,081,732	9,578,800	4,277,914
Cash - Restricted	87,641,439	93,130,094	86,095,966
Total Cash	91,723,171	102,708,894	90,373,880

### (ii) Reconcilliation of net cash used in operating activities to change in net assets arising from operations

	BUDGET 2018/2019 \$	FORECAST 2018/2019 \$	BUDGET 2019/2020 \$
Net Change in assets from operations	7,084,278	10,052,906	8,758,333
Write back Depreciation	5,066,853	4,076,421	5,426,921
Write back Provisions	202,373	229,383	236,821
Write back Accruals - Staff Entitlements	29,344	29,006	29,624
Write back (Profit)/Loss on sale of assets	(70,297)	(34,724)	(51,001)
Net cash from operating activities	12,312,551	14,352,992	14,400,698

### (iii) Depreciation of Assets

Details of depreciation expenditure budgets for each program are as follows

	BUDGET 2018/2019 \$	FORECAST 2018/2019 \$	BUDGET 2019/2020 \$
Administration	367,434	271,848	333,695
Community Amenities	2,724,116	2,219,148	3,278,199
Other Property and Services	1,975,303	1,585,425	1,815,027
Total Depreciation all Programs	5,066,853	4,076,421	5,426,921

### 5. FEES AND CHARGES SUMMARY BY PROGRAM

	BUDGET 2018/2019 \$	FORECAST 2018/2019 \$	BUDGET 2019/2019 \$
Administration	0	0	0
Community Amenities	37,058,195	37,465,899	40,036,790
Other Property and Services	6,000	0	0
Total Statutory Fees and Charges	37,064,195	37,465,899	40,036,790
	BUDGET 2018/2019 \$	FORECAST 2018/2019 \$	BUDGET 2019/2019 \$
<u>User Charges</u>			
Ordinary activities	30,773,308	32,130,871	34,133,183
Other activities	1,012,500	87,021	705,000
Special Charges			
Ordinary activities	445,165	442,603	442,603
Secondary Waste Charge			
Other activities	4,833,222	4,805,404	4,756,004
Total Statutory Fees and Charges	37,064,195	37,465,899	40,036,790

### 6. LOAN BORROWINGS

### (a) Loan Repayments

No loans existed as at 30 June 2019 and no loans are anticipated during the 2019/2020 financial year.

### (b) Unspent Loans

No unspent loan funds existed as at 30 June 2019 and no unspent loan funds are anticipated during the 2019/2020 financial year.

### (c) New Borrowings

The EMRC does not propose to undertake new borrowings during the 2019/2020 financial year.

### (d) Overdraft

Council has not utilised an overdraft facility during the 2018/2019 financial year and it is not anticipated that any such facility will be utilised during the 2019/2020 financial year.

### 7. COUNCILLOR FEES AND ALLOWANCES

From July 2019 each Councillor, other than the Chairman, will be entitled to an annual meeting fee of \$10,560.

From July 2019 the Chairman will be entitled to an annual meeting fee of \$15,839 as well as an annual Local Government fee of \$20,063.

From July 2019 the Deputy Chairman will be entitled to an annual Local Government fee of \$5,016.

A provision of \$12,376 for meeting fees has been provided for deputy Councillors when deputising for a Councillor at a meeting. All fees paid to Councillors and the Chairman are paid quarterly in arrears.

All fees are in accordance with the 2019 Salaries and Allowances (SAT) Tribunal determination.

	BUDGET 2018/2019 \$	FORECAST 2018/2019 \$	BUDGET 2019/2020 \$
Councillor(s) meeting fees	116,730	116,730	116,160
Chairman's meeting fees	15,917	15,917	15,839
Chairman's Local Government fee	20,162	20,162	20,063
Deputy Chairman's Local Government fee	5,040	5,040	5,016
Deputy Councillors' meeting fees	12,580	12,580	12,376
Total Fees and Allowances	170,429	170,429	169,454

### 8. INVESTMENT INTEREST

The total estimated earnings from interest on investments is made up as follows:

	BUDGET 2018/2019	FORECAST 2018/2019	BUDGET 2019/2020
	\$	\$	\$
Interest on Restricted Assets			
Interest on funds held in Reserve	2,347,314	2,762,300	1,587,397
Interest on other restricted investments (LSL)	24,285	30,000	17,562
Sub-Total Interest on Restricted Assets	2,371,599	2,792,300	1,604,959
Interest on Other Funds			
Interest on Municipal funds	400,000	336,000	270,000
Total Interest on Investments	2,771,599	3,128,300	1,874,959

### 9. ASSET PROFIT OR LOSS ON DISPOSAL
