Introducing the Beyond Gardens Team

Beyond Gardens

- A group of independent consultants.
- We do not accept sponsorship from garden related products.
- To date we have welcomed 97,402 participants to 1,103 seminars/events.
- Have run seminars in 136 different LGA's leaving only 3 mainland LGA's to go.

Beyond Gardens

- Gardenwise, Foodscaping, Bushfood in the Backyard, Bioscaping. Urban and Rural
- Waterwise schools and community gardens
- Beyond Gardens Live TV series.
- Waterwise Verge Makeover program....

2010 Water use : 415m³

2013 Water use : 284m3

31% annual water use reduction

2010 Water use : 146m3

beyond
gardens

Waterwise Verge Makeovers - before

2013 Water use : 92m3

36% annual water use reduction

2010 Water use : 701m3

2013 Water use : 447m3

36% annual water use reduction

Equivalent to 70% of the water in an Olympic sized swimming pool in 4 years

Reduced Water

Reduced fertiliser

Reduced maintenance

Reduced pesticides

Increased biodiversity

Increased savings

To spray or not????

Bare soil is an open invite to weeds

What's the difference in water consumption?

**Use integrated or inline drip irrigation.
No sprinklers!**

**Create shallow depressions in the soil to help capture rainfall runoff.
Mounding on sand is just silly!**

Shape the verge so that the final height of mulch is below the kerb

Create shallow depressions in the soil to help capture water and then spread a 75mm layer of Waterwise Mulch. There should be little runoff.

A Waterwise mulch has large, irregularly shaped particles that hold little, if any, water providing good weed suppression.

Dense planting of fast growing annuals can inhibit weed growth

Weed suppression while adding a splash of colour

Aim for canopy closure to suppress weeds
