

Red Hill Waste Management Facility and Hazelmere Resource Recovery Park

Environmental Policy

Commitment

The Eastern Metropolitan Regional Council (EMRC) manages the Red Hill Waste Management Facility and the Hazelmere Resource Recovery Park on behalf of its six member Councils in the eastern region of the Perth metropolitan area. The EMRC is committed to minimising the environmental and social impacts of operations by working towards best practice management.

Objectives

To fulfil these commitments the EMRC will:

- Comply as a minimum with all applicable environmental legal obligations and internal EMRC standards;
- Openly and transparently report our environmental performance;
- Strive to meet community expectations through addressing concerns and providing avenues for them to liaise with EMRC staff and management;
- Strive for continual improvement by implementing and maintaining an Environmental Management System that is communicated and supported from management to operational staff and contractors (at all levels) to enhance environmental performance and achieve best practice management;
- Continue to be innovative by supporting research into the understanding of the environment which will enable the use of sound data as the basis for all environmental and operational decisions;
- Encourage and support better waste management practices through education and waste avoidance and recovery strategies;
- Prevent pollution and protect the environment by assessing the environmental implications of planning decisions associated with the design, construction and operation of the Red Hill Waste Management Facility and Hazelmere Resource Recovery Park;

- Raise environmental awareness for staff and contractors to be aware of and accountable for their individual contributions to environmental performance and encourage every employee and contractor to demonstrate respect for the environment;
- Be committed to reducing greenhouse gas emissions through appropriate mitigation and adaptation strategies and evaluate the climate change implications of operational and strategic decisions; and
- Focus on meeting the needs of current and future generations by integrating environmental sustainability, social opportunities and economic development into the Red Hill Waste Management Facility and Hazelmere Resource Recovery Park operations.

Responsibilities

Each employee and contractor has a personal obligation to comply with the Red Hill and Hazelmere Environmental Policy.

Management is responsible for taking this policy into consideration when making any planning or operational decisions. Management is also responsible for ensuring the policy is communicated to and implemented by all staff, contractors, suppliers, local community and visitors.

The environmental program will be audited on a regular basis to confirm and improve performance against the requirement of this policy.

The EMRC publicly reports its environmental performance in its annual monitoring and compliance report.
